

## Installation Instructions

1. Clone project into a directory.
2. Ensure Docker is running

### Start API server and Database

3. Open a terminal, and `<cd>` into `/back/server`
4. Add a hidden environmental file: `<touch .env>`
5. Add the following two line to the `.env` file
  - a. `"DB_CONNECTION_STRING=postgres::docker@localhost:5432/smeid"`
  - b. `"POSTGRE_PASSWORD=$$$$$$"` where `$$$$$` = postgres password
6. Run `<npm install>`
7. Run `<npm start>`

### Start user interface server (frontend)

8. Open another terminal, and `<cd>` into `/front/sme`
9. Run `<npm install>`
10. Run `<npm start>`
